

Experiment No. 1: Port Scanning Tools

Aim

To perform different types of port scanning using the **Nmap** tool in Kali Linux.

Software Required

- Kali Linux
- Nmap

Commands Used

1. TCP SYN Scan

```
sudo nmap -sS 192.168.50.179
```

2. TCP Connect Scan

```
sudo nmap -sT 192.168.50.179
```

3. UDP Scan

```
sudo nmap -sU 192.168.50.179
```

4. TCP ACK Scan

```
sudo nmap -sA 192.168.50.179
```

Result

The different types of port scanning (TCP SYN, TCP Connect, UDP, and TCP ACK) were successfully performed using **Nmap** in Kali Linux.
